

Exporting Analytics Data

Quick Reference Guide

This guide covers how to export monthly user metrics from the Analytics Dashboard into a CSV or PDF format.

Prerequisites

- You must have an active **Administrator** or **Data Analyst** account role.
- Ensure your browser's pop-up blocker is disabled for dashboard.company.com.

Step-by-Step Export

1. Navigate to the **Reports** tab from the main left-hand menu.
2. Select your desired date range using the **Date Picker** dropdown menu (default is "Last 30 Days").
3. Click the **Export** button in the top-right corner of the data table.
4. Select your preferred file format from the dropdown menu:

Format	Best For	Included Data
CSV	Raw data analysis & spreadsheet importing	Raw data matrices only
PDF	Executive presentations & offline viewing	Graphs, charts, and summaries

5. Click **Confirm Download**. The system will generate the report; your download will begin automatically within 5 seconds.

Note: For date ranges exceeding 180 days, the system may take up to 2 minutes to compile the file. Do not close or refresh the browser tab during this process.
